SUMMARY

Backend Software Engineer with **8+ years** building from scratch **cloud native, high availability backend systems** using **C#, .NET, Azure, SQL/NoSQL, microservices and distributed systems**. Strong experience designing **scalable storage services, secure APIs, event driven architectures and performance optimized infrastructure**. Proven ability to deliver reliable, compliant and analytics ready systems across enterprise and consumer environments.

WORK EXPERIENCE

Senior Software Engineer **Independent** **July 2024 - Present**

- Building websites for **(TrendingCelebsDaily, KrithiAarna)** with unique features, leveraging latest solutions from major tech companies.
- Built a cloud native content ingestion and storage pipeline using **Azure Functions, Blob Storage and Distributed Caching**, improving data freshness and retrieval latency by **40%**.
- Developed a full stack Android app with a **C#/.NET backend + Azure/OpenAI**, reducing image search latency by **35%** through optimized storage and indexing.
- Enhancing **open source projects** (Browser Extensions, MasterRobot, tinygc.net, SQL analytics tools etc) with cloud readiness.

Software Engineer **SCU Frugal Innovation Hub** **Sept 2023 – June 2024**

- Led backend development for a Flutter iOS mental wellness app, integrating analytics dashboards and content delivery services.
- Delivered multiple **REST/gRPC APIs** with CI/CD automation, reducing deployment friction by **30%**.

Sr. Software Developer **QualBrain** **Apr 2021 - Aug 2022**

- Built a **C#/.NET + SQL Server** medical analytics platform that cut EEG reporting time from hours to minutes, improving clinician throughput by **60%**.
- Delivered **EU compliant** multi-clinic data integration with NATUS/SCORE EEG, increasing system scalability.
- Implemented **100%** business intelligence model test coverage immediately upon onboarding onto the feature, identifying **20+ issues**.

Technical Sabbatical **Sept 2019 - Mar 2021**

- Completed structured learning in backend (ASP.NET Core), cloud (Azure Functions, CI/CD pipelines) and computer vision (AForge.NET), applying concepts in personal projects.
- Built personal and open source projects to apply new skills in production like settings.

Software Engineer **Microsoft** **July 2014 - Aug 2019**

- Led the development of a global OEM analytics portal from scratch using **C#, ASP.NET, Azure App Services, SQL Azure, Service Bus, Azure Analysis Services, Azure Data Factory, Redis cache** serving **300+ partner organizations** and reducing data latency by **45%**.
- Designed and developed a secure seller payment automation framework using **C#, .NET, SQL Server, Azure AD**, reducing manual processing by **80%** and reducing discrepancies.
- Led CI/CD modernization in Azure DevOps, increasing deployment frequency by **30%** with **90% test coverage**.
- Mentored junior engineers through onboarding on Microsoft business verticals, tools, team architecture and coding standards.

TECHNICAL SKILLS

Languages: C#, Python, T-SQL, TypeScript, ASP.NET Core, Angular, Flutter

Backend & Cloud: .NET, .NET Core, Azure App Services, Azure Functions, SQL Server, Cosmos DB, Docker, Azure Kubernetes Service, Redis, RabbitMQ, ASB, Microservices, Distributed Computing, REST, GraphQL, gRPC

DevOps & Observability: Azure DevOps, CI/CD, Release automation, App Insights, Azure Monitor, Logging/Alerting

Security & Compliance: OAuth2, Azure AD, MFA, Key Vault, Secure API design, SOC 2-aligned SDLC, EU-compliant data workflows

Testing & Quality: REST/gRPC API testing, Test Strategy, E2E testing, Database Validation, Test automation

AI & Automation: Semantic Kernel (Chatbot, RAG, Agentic AI), AI-assisted coding (GitHub Copilot CLI, VS Code Agent)

EDUCATION

Master of Science, Computer Science and Engineering **Santa Clara University, USA** **Sept 2022 – June 2024**

Bachelor of Engineering, Information Technology **Osmania University, India** **July 2010 – June 2014**
